Outbreak of Coronavirus Disease (COVID-19)

CARPHA Situation Report – No. 13 February 19, 2020

Summary

On 11 February 2020 the WHO confirmed that the disease formerly referred to as the 2019 novel coronavirus (2019-nCoV) has officially been named coronavirus disease (COVID-19).

This is an update to the Situation Report in relation to the outbreak of COVID-19, published on February 17, 2020.

An outbreak of novel coronavirus causing severe acute respiratory illness has been reported in Wuhan, China since December 21, 2019. There is evidence of human-to-human transmission among cases mostly in Wuhan city, but also in Japan, Vietnam, Germany and the United States of America. On January 30, 2020 the World Health Organization (WHO) announced that this outbreak is a Public Health Emergency of International Concern.

To date there have been no reported cases in the Region, hence the risk of importation of COVID-19 to the Region continues to be deemed LOW. CARPHA is working closely with international health partners to respond to this public health threat and provide timely advice and assistance to Member States and other regional partners and stakeholders. CARPHA will continue to work with regional health security partners to review this risk level in the context of the changing global situation.

Relevant intelligence

The US CDC issued a travel notice on February 19th highlighting community spread of COVID-19 in Hong Kong. The notice comes after news of the detection of new cases of the disease in Hong Kong, who have reported no exposure to a known case or travel to affected areas.

China continues to report clinically diagnosed cases without laboratory confirmation from Hubei Province. The WHO has included the number of clinically diagnosed cases in the Hubei Province in the total number of cases reported. CARPHA will use the statistics reported by the WHO, supplemented by other sources, where information is not available.

As of February 19, there were 75203 cases of patients with COVID-19. Outside of China, twenty-six (26) countries have confirmed at least one case among travellers exposed in China and/or person-to-person

CARPHA: COVID-19 Situation Update No 13: February 19, 2020
Of the deaths reported to date, four were from outside of Mainland China. See Table 1 for more details on cases, deaths and recoveries.

Impact

CARPHA’s Incident Management Team for Emergency Response (IMT-ER) continues to work with regional and international health partners to respond to this public health threat and provide timely advice and assistance to Member States and stakeholders. The Region has not had any confirmed cases of COVID-19 to-date.

Governance

CARPHA’S IMT-ER is leading the health response in keeping with CARPHA’s mandate from the Intergovernmental Agreement (IGA). The IMT-ER produces Situation Reports three times weekly and the most recent IMT-ER Debrief that reviewed the Incident Action Plan was held on Thursday 6th February.

Operations

Surveillance and Technical Response

- CARPHA has modified the Weekly Syndromic Surveillance Reporting Form to enable Member States to report on COVID-19 surveillance each week. The revised form will be circulated to Member States this week to enable feedback to allow operationalization of the form by Epi Week 9.
- Various technical guidance has been developed including various algorithms to assist Country Member States (CMS) to triage and manage suspected cases within their borders and in clinical settings.
- To view all CARPHA technical guidance documents regarding COVID-19, please go to this website [http://carpha.org/What-We-Do/Public-Health/Novel-Coronavirus](http://carpha.org/What-We-Do/Public-Health/Novel-Coronavirus) (See also a list on the last page).
- Circulated guidance to CMS and various stakeholders on the identification, isolation and response to suspected cases arriving via sea or air and for Ports of entry in CMS.
- Activated the APIS Security Cluster tracking of passengers from China through IMPACS.
- Activated the Regional Coordinating Mechanism for Health Security in collaboration with the Caribbean Disaster and Emergency Response Agency and working closely with other stakeholders including OECS and CARICOM, PAHO, and IMPACs for a coordinated regional response.

Laboratory

- CARPHA Medical Microbiology Laboratory (CMML) has procured the appropriate primers, reagents and molecular diagnostic tests and has boosted laboratory capacity in order to test samples from Member States for SARS-COV-2, the new coronavirus causing COVID-19. CMML is working closely with Laboratory Directors on plans of action to manage the COVID-19 emergency.
- Table 2 provides a breakdown of the number of samples and the results for tests carried out during Epi weeks 7-8 by CMML.

Expert Advice

- CARPHA has set up an expert Technical Advisory Group to provide guidance on the management of cases, should transmission occur in the region.
Table 2: Summary of laboratory test results for SARS-CoV-2 conducted at CMML as at 18 February 2020.

Communication and Information

- On 17th February 2020, Dr. St John was a guest (virtually) on Grenada Broadcasting Network’s Beyond the Headlines with Grenada Minister of Health Honourable Nickolas Steele and Chief Medical Officer Dr Francis Martin to discuss COVID-2019: national and regional overview. [https://youtu.be/BTzAH7c-I04](https://youtu.be/BTzAH7c-I04)
- CARPHA’s Executive Director participated in a joint virtual media briefing with PAHO and CDEMA, hosted by the Caribbean Broadcasting Union for its print, television, and radio members.
- On 10th February, CARPHA distributed a media release titled ‘CARPHA Medical Microbiology Laboratory is Ready to Respond to 2019-nCoV’.
- CARPHA Communications Unit has produced a Social Media Plan of Action for COVID-19 to support Regional Communications Strategy and combat the spread of misinformation spread to the public. The Communications Team is working closely with the Regional Health Communications Network (RHCN) and other stakeholders to provide timely updates and information. They have also developed various videos and infographics to counteract myths about the disease circulating in the Region. The latest media release and other relevant guidelines are available on CARPHA’s website [http://carpha.org/What-We-Do/Public-Health/Novel-Coronavirus](http://carpha.org/What-We-Do/Public-Health/Novel-Coronavirus)

Logistics and Planning

- Samples from Member States and reagents are being processed through the Trinidad and Tobago Customs Department without delay.
• Several Member States have implemented various measures to limit importation of the disease, including screening at ports of entry. Details can be obtained from the Ministries of Health of each member state.

Stakeholder Engagement

CARPHA is working closely with various stakeholders for a coordinated regional response, including the following:

• The Executive Director and Acting Director of Surveillance Disease Prevention and Control represented CARPHA at the 31st Intersessional Meeting of the Conference of Heads of Government of CARICOM, in Barbados on 18-19 February. They presented on the regional coordination of the coronavirus disease (COVID-19) including a regional communication strategy for COVID-19.
• Participated in CDEMA led Regional Exercise Region Rap 2020 to test CDEMA’s means of communication with their stakeholders.
• Held coordination meeting with Dr. Jean Marie PWR Barbados and the Eastern Caribbean and the World Bank on support to the preparation activities of Grenada, St Lucia, St. Vincent and the Grenadines, Dominica.
• Met with PAHO focal point for clinical management.
• Delivered health education lecture on COVID-19 to Medical Officers of Health and Public Health Inspectors from all municipal corporations in Trinidad, at a meeting organised by Port of Spain Municipal Cooperation and the Ministry of Local Government and Rural Development on 14 February.
• Convened the Regional Coordinating Mechanism for Health Security, consisting of Member States, regional and international agencies (including CDEMA, CARICOM, OECS, PAHO, CDC, PHE, PHAC, RIVM, ARS), with agreement on a joint harmonized regional response.
• Ongoing communications with CARICOM on regional health response to COVID-19
• Convened a webinar for Caribbean Hotel and Tourism Association (CHTA) and Caribbean Tourism Organization (CTO) and Ministers of Tourism on “Mitigating the impact of Coronavirus” with over 120 participants.
• Ongoing communications with Cruise Lines International Association (CLIA) with regards to the Caribbean response to 2019-nCoV situation on cruise ships.
• Held nine COVID-19 response coordination meetings with Chief Medical Officers and CARICOM.
• Convened a joint briefing of National Disaster Coordinators in association with CARPHA.

Way forward

CARPHA has identified that with the rapid spread of the virus from China to 25 other countries, CMS need to be in a state of readiness for any imported cases and subsequent local transmission. CARPHA is working with Technical experts across the region to provide up-to-date guidance and technical advice to CMS.
CARPHA would like to draw attention to various guidance documents, including several protocols for early investigations available from WHO website https://www.who.int/docs/default-source/coronaviruse/situation-reports/20200216-sitrep-27-covid-19.pdf?sfvrsn=78c0eb78_2

CARPHA recommends that CMS continue to be vigilant, step up surveillance at their ports of entry and to ensure the relevant measures are in place to manage any imported cases that may arrive on their shores.

CARPHA stands ready to provide support and guidance to Member States as to how to strengthen their health systems response if person-to-person transmission becomes established in the Caribbean.

Key CARPHA documents that can be accessed from our website using the embedded links:

**Technical Documents**

- Traveller's Guidelines
- Algorithm for Management of a suspected case
- Guidelines for Ports of Entry
- Guidelines for Conveyances
- Algorithm for contact tracing on conveyances

**Media Releases:**

- The Risk of 2019-nCoV Remains Low for the Caribbean but CARPHA Encourages Vigilance at Ports of Entry
- 2019-nCoV: CARPHA urges the Region to be Vigilant, Be Prepared
- Risk of Novel Coronavirus in the Caribbean "Low" says CARPHA, but Preparation Needed
- CARPHA Medical Microbiology Laboratory is Ready to Respond to 2019-nCoV

**Communications Material**

- Is there a new bleach cocktail that can cure and protect against the Flu and the Novel Coronavirus?
- How is the Novel Coronavirus new? Lysol and Clorox have “Human Coronavirus” listed on their labels
- Can a surgical mask protect me from coronavirus? CARPHA Biorisk Manager explains
- Who should wear a mask for protection against coronavirus? CARPHA Biorisk Manager responds
- Card 1: Cover your nose and mouth
- Card 2: Cough or sneeze into elbow
