Reducing the Risk of COVID-19: Guidance for Public Transportation

Personal Protection

For the Public and Service Providers:

Clean hands often with soap and water or 60-80% alcohol content (ethanol or isopropanol).

Cough or sneeze into a bent arm or a tissue.

If you have fever, cough and difficulty breathing, seek medical care.

Avoid close contact, when possible, with anyone who is sick.

Limit Contact

For the Public and Service Providers:

Face coverings should be worn by everyone above the age of 2.

If you are ill, stay at home.

Use screens to reduce the contact of drivers and passengers.

Use markers to reduce the closeness of persons who are waiting to board.

Stand on the X. Social distancing in effect. Keep 6 metres apart!
For disinfection of hard, non-porous surfaces, use:
- Diluted household bleach solution (1 cup of bleach to 9 cups of water)
- Alcohol solution with at least 70% alcohol (ethanol or isopropanol)

For soft or porous surfaces such as fabric seats, remove any visible contamination and clean with:
- Diluted household bleach solution (as above)

- Doors and windows should remain open when cleaning the vehicle.
- Clean and disinfect commonly touched surfaces in the vehicle before and after each shift.
- Follow cleaning and disinfection procedures consistently and correctly.
- Wear disposable gloves compatible with the products being used and any other protective garments required. Dispose of gloves after use.
